

Embedded Vision Alliance Announces Call for Papers for 2019 Embedded Vision Summit

WALNUT CREEK, Calif. – October 30, 2018 – The Embedded Vision Alliance® today announced its call for papers has opened for the 2019 [Embedded Vision Summit™](#), which will take place May 20-23, 2019, in Santa Clara, Calif.

The Embedded Vision Summit is the only event focused exclusively on deployable computer vision, attracting a global audience of more than 1,000 attendees from companies developing vision-enabled products at the edge and in the cloud. The event features industry innovators, top technologists and engineers who are designing “machines that see” for a wide range of industries including automotive, entertainment, healthcare, manufacturing, retail, robotics and security. The Summit’s Technology Showcase offers hundreds of vision technology demos from more than 60 companies.

“The Embedded Vision Summit is a one-of-a-kind event focused on enabling people to incorporate computer vision into diverse systems, devices and applications in practical ways. Approximately 85 percent of attendees at the most recent Summit were actively developing vision products—and 97 percent said they would recommend this event to a colleague,” said Jeff Bier, founder of the Embedded Vision Alliance.

The Embedded Vision Summit 2019 will feature four presentation tracks focused on computer vision trends, technologies and techniques, at the edge and in the cloud:

- **Technical Insights** presentations will focus on practical technical education and include techniques, trade-offs and case studies useful to vision product developers.
- **Enabling Technologies** presentations will highlight the latest vision-related products from Member companies of the Embedded Vision Alliance.
- **Business Insights** presentations will provide insights useful to business decision makers, including market and technology trends, business models, and case studies illustrating how vision technology is delivering value to consumers, businesses and other organizations.
- **Fundamentals** presentations will provide introductory technical tutorials on topics of broad interest to developers incorporating computer vision into products and systems.

The deadline to submit presentation proposals is December 1, 2018. Proposals can be submitted online via the [Embedded Vision Summit website](#).

About The Embedded Vision Alliance®

The Embedded Vision Alliance is a worldwide industry partnership bringing together technology providers and end product companies who are enabling innovative and practical applications for computer vision for a range of market segments and applications, including automotive, consumer electronics, gaming, imaging, and more. Membership is open to any company that supplies or uses technology for computer vision systems and applications. For more information on the Alliance, visit <https://www.embedded-vision.com>.
