Deploying Vision in the Cloud

- Public cloud providers offer a growing selection of accelerators for computer vision and machine learning
 - GPUs, FPGAs, TPUs
- Expanding array of APIs (e.g., Amazon Rekognition)
- Cloud platforms ease assembling solutions and scaling them

- For a few high-volume markets (e.g., automotive, mobile phone, video surveillance), suppliers offer integrated domain-specific platforms
- These complex hardware-software subsystems provide much of the functionality required for the application

Smart Spaces: Camio

The screenshot displays the Camio mobile application interface. At the top, there are three icons: a green video camera, an orange clock, and a grey circle. The 'camio' logo is positioned in the top right corner. Below these is a search bar containing the text 'animal front of house'. The main content area features three side-by-side video thumbnails showing a residential driveway with a deer in the foreground. At the bottom right, there are links for 'Privacy Policy | Terms of Service' and the text 'Powered by camio®'.

Preventing Injuries from Falls

Test Summary

Description: Balance is the result of visual system (eyes), vestibular system (ears) and proprioception (the body's sense of where it is in space) working together. mCTSIB is designed to assess how well an older adult is using sensory inputs when one or more sensory systems are compromised which can lead to balance deficits.¹

Overall Result: Patient's Overall score has increased by 29 from 51 to 80. This change occurred from 02/10/2019 to 02/18/2019. This is a percentage increase in overall score is 56.86%.

The Embedded Vision Alliance

The **Embedded Vision Alliance** is a partnership of 90+ leading computer vision technology and systems companies

We inspire and empower product developers to create better products using computer vision and visual AI

For free educational resources, visit www.embedded-vision.com and sign up for our newsletter

We help companies find their best opportunities in this burgeoning industry

For membership info, contact us: info@embedded-vision.com

Live Training: Deep Learning for Computer Vision with TensorFlow 2.0 and Keras

An Embedded Vision Alliance training class

- Friday, **November 1**, 2019, 9:00 am – 5:00 pm
- Mentor - Fremont, California

Instructor: Doug Perry, a Google Developer Expert in TensorFlow

- ✓ Combination of lecture and lab exercises using Jupyter Notebooks
- ✓ Includes lunch and breaks
- ✓ You will learn:
 - ✓ Neural networks in TensorFlow
 - ✓ Linear regression
 - ✓ Shallow image recognition
 - ✓ Deep image recognition
 - ✓ Convolutional neural networks
 - ✓ Data set creation and augmentation
 - ✓ Off-the-shelf network architectures; transfer learning
 - ✓ Object detection
 - ✓ TensorFlow Lite

Join Us At the Embedded Vision Summit

The only industry event focused on practical computer vision and visual AI

- *95% of attendees would recommend the Summit to their colleagues building vision products*
 - *“Fantastic. Learned a lot and met great people.”*
 - *“Wonderful speakers and informative exhibits!”*

Embedded Vision Summit 2020 will include:

- **100 expert technical, business and product talks**
- **Hands-on full day technical trainings**
- **100+ demos** by more than 60 exhibitors
- Visit www.embedded-vision.com/summit for details!

What Does It All Mean?

- Computer vision/visual AI deployment is accelerating rapidly
 - Fueled by:
 - Deep learning – “dominant design”
 - Rapid improvements in processors
 - Better tools, libraries, platforms
 - 3D sensors
 - There are numerous huge opportunities
 - At the solutions level – thousands of applications
 - At the software level – especially tools-as-a-service
 - At the module level
 - We are entering a golden era of commercial computer vision
 - Take advantage of it! Go out and make something!

Embedded Vision Alliance Member Companies

Questions?

We'll email you a link to these slides, and to a recording of the webinar.

Email me for:

- Questions
- Information about the Embedded Vision Summit (May 18-21, 2020)
- Information about how your company can become a Member of the Embedded Vision Alliance
